NURSERY STOCK OF ALL KINDS

A. G. BLOUNT

Grower of True-to-Name Nursery Stock HASTINGS, N. Y.

Oswego County

TO OUR CUSTOMERS

I wish to thank you all for your patronage in the past and kindly ask for a continuance in the future. You will notice we have added several items through our catalogue, which we have never listed before. This will no doubt help you in your plans for planting. We aim to grow a supply of stock which most people are interested in and which is the most satisfactory to plant. We have an instruction booklet which we are giving free to all customers who place an order with us and asks for it. The booklet will give you some very valuable information on how to plant and grow everything from the nursery.

MY RELIABILITY. Write the First National Eank of Cent-al Square or The State Bank of Parish, N. Y., or any person in Hastings, Central Square or Parish, N. Y. Please enclose stamp for reply.

IF CUSTOMERS will tell us the name of the station where they receive their freight and express, we will then send the stock the best way, to the customer's advantage.

PARCEL POST is the Best and Cheapest way to make shipment, whenever possible, and according to weight and zone. The customer pays the postage when he gets the shipment.

GUARANTEE. We use all reasonable precaution to have everything true to name and description, and stand ready to replace or refund the purchase price on stock not found as ordered or represented by me. But it must be understood that we shall not be held responsible for any sum greater than the cost of the stock.

FRESH DUG TO ORDER. All our stock is fresh dug either from the nursery row or our plant fields. We keep everything in fresh growing condition.

CUSTOMERS may order six of a kind at one dozen rates, 50 at 100 rates and 500 at 1000 rates.

PHONE OR TELEGRAPH us at Central Square, N. Y.

STATE OF NEW YORK—DEPARTMENT OF FARMS & MARKETS CERTIFICATE OF INSPECTION OF NURSERY STOCK No. 901 BERNE A. PYRKE, Commissioner

THIS IS TO CERTIFY That the stock in the nursery of A. G. Blount of Hastings, County of Oswego, State of New York, was duly examined in compliance with the provisions of Article 14 of the Farms and Markets Law, and was found to be apparently free from any contagious or infectious disease or diseases, or the San Jose Scale or other dangerously injurious insect pest or pests. This certificate expires September 1, 1926.

Dated, Albany, N. Y., September 1, 1925.

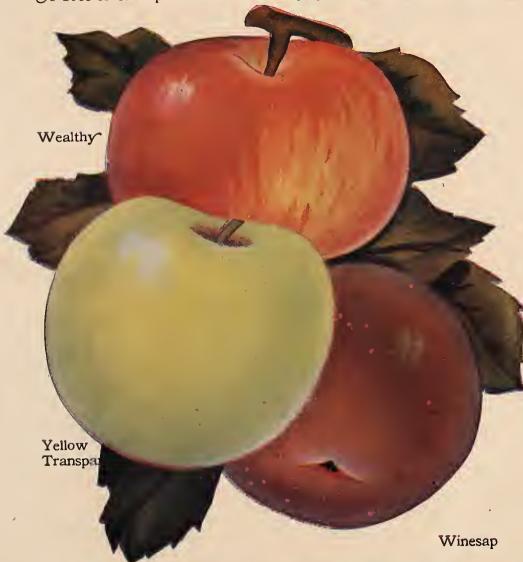

By GEO. G. ATWOOD, Director Bureau of Plant Industry. BERNE A. PYRKE, Commissioner.

The Family Group

Delicious Apples from July to June

A Tree of each provides a Year's Supply of this Healthful Fruit

YELLOW TRANSPARENT—July to September. Best Summer Apple WEALTHY—October to Mid-winter. One of the best of the Fall Varieties WINESAP—January to June. An Excellent Winter Sort and a Great Keeper

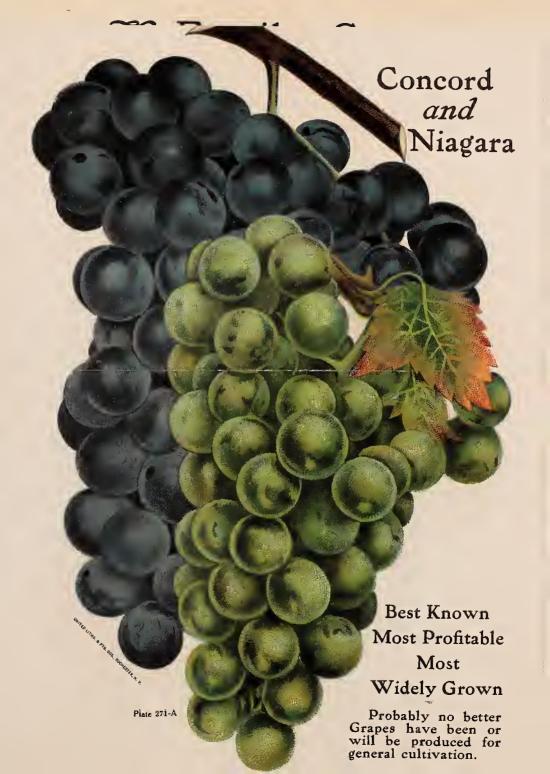

Concord & Niagara

Best Known & Most Widely Grown Grapes on the American Continent

CONCORD represents the dominent type of our native species. In New York State approximately seventy-five per cent of all the grapes grown are Concords. This fine old grape needs no introduction or description. Every one knows and prizes it. It has always been a favorite and always will be. Many newer varieties have been introduced and their merits acclaimed from the housetops, but Concord still holds the place of honor. It has been well tried and never found wanting. Its elasticity of constitution adapts itself to all soils and conditions and enables it to yield a large crop year after year.

NIAGARA is the leading American green grape, holding the rank among green grapes that Concord holds among the black varieties. In vigor and productiveness they are unsurpassed by any others. In size of bunch and berry, Niagara will average fully up to Concord and like it has that peculiar musky flavor so appealing to most tastes and which is retained a long time after being gathered; in fact, it seems to improve with age and the aroma from a dish of Niagaras will fill a room with its appetizing odor and is equal to a vase of tea roses. Ripens with Concord and like it is a leading market variety and most profitable sort of its color.

LOWEST IN PRICE—HIGHEST IN QUALITY UNEXCELLED FOR HOME OR MARKET

2-12-26

Fruit Trees, Vegetables and Berries

HYSLOP CRAB APPLE

HYSLOP CRAB APPLE

An orchard is not complete without some of these beautiful crab-apples. The bright red color, and fine flavor make it the most valuable for home use,

See Price List Page 11

VICTORIA RHUBARB

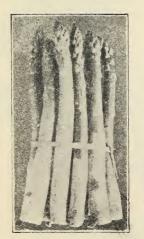

Large, thrifty growing. Delicious during the early summer months. Very beneficial to the health. Rhubarb lasts. for years, it should be taken up at intervals of about 3 years and a part of the roots removed, especially where the clumo is broadening out; thus preventing the stalks from growing small. Requires rich soil.

See Price List Page 12

HORSERADISH, MALINER KREN

This is the vegetable we use to tone our appetites in the spring. Grows large and vigorous, sweet and tender.

See Price List Page 12

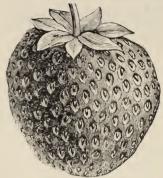

ASPARAGUS

Easily grown needs very little attention and lasts for years. Well rotted straw, leaves or barn-yard manure liberally applied in the autumn make an excellent fertibetter in the early summer than asparagus.

See Price List Page 12

MALINER KREN HORSERADISH

WAITS PERFECTION (Strawberry) FALL-BEARING

THE PLUM FARMER

The Plum Farmer ranks as the foremost of the black varieties of raspberries. Early, firm, large, most producive and fine flavor. The seeds are not noticeable as in most black varieties. There are more acres of Plum Farmer growing than all other black varieties combined.

See Price List, Page 13

DOWNING GOOSEBERRY

A garden is not complete without at least one-half dozen bushes of this delicious berry.

See Price List, Page 11

CHERRY CURRANT

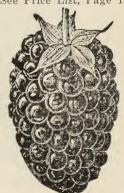

The most reliable of currants. See Price List, Page 11

A new variety. So far this berry has proven very satisfactory, in most all respects. Through my experience as a nurseryman it is best to plant new varieties of the fall-bearing berry that has been recently originated, as we find after repeated plantings year after year, the plants divert back to the spring bearing sorts, thus producing little if any berries in the autumn.

See Price List, Page 13

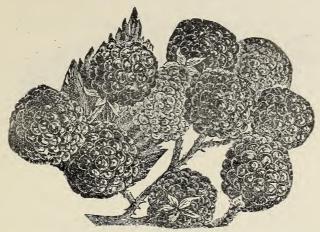

LUCRETIA DEWBERRY

I believe this to be the most profitable of blackberries, easily grown, all localities. This berry combines the good qualities of all blackberries. See Price List, Page 13

LUCRETIA DEWBERRY

PLUM FARMER BLACK RASPBERRY

THE SNYDER

The Snyder is the old standard of blackberries, hardy, does well in cold climates, fruit good flavor, firm and productive.

See Price List, Page 13

SNYDER BLACKBERRY

HONEYSWEET BLACK RASPBERRY

A new late variety large, firm and of a honey like flavor. See Price List, Page 13

ROYAL PURPLE RASPBERRY

ROYAL PURPLE

A new variety of purple berries, it has the good qualities of the Columbian and a brighter red color.

See Price List, Page 13

COLUMBIAN PURPLE

One of the first purple raspberries and still the most widely grown. It must be very satisfactory.

See Price List, Page 13

CUTHBERT RED RASPBERRY

WORDEN GRAPE

This fine grape should be planted in your collection for home use. A few days earlier than the Concord, color dark. Delicious flavor.

See Price List, Page 11

Ornamental Vines, Shrubs and Trees

RAMBLERS

The beauty of the rambler rose is so well known, we will not attempt to describe it. Among the very choicest are, Dorothy Perkins, pink; Dorothy Ferkins white; Excelsia, scarlet; Crimson Rambler and Climbing American Beauty.

See Prices Page 14

BOSTON IVY

This is the famous ivy used so extensively on brick, stone and stucco buildings. The foliage is dense, completely covering a surface, and the autumnal tints of green and red are unsurpassed for beauty.

See Price List Page 16

WISTERIA, PURPLE-CHINESE

One of the best Wisterias, rapid growing, pretty foliage, hardy, great clusters of flowers, resembling clusters of grapes. Nothing better in vines.

Wisteria, white, same as the purple only in color. See Price List, Page 16

SPIREA VAN HOUTTE

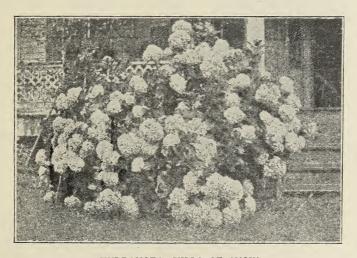

Graceful, with long drooping sprays thickly studded with handsome pure white flowers; hence its popular name bridal wreath. The finest spirea of them all. Our illustration was taken from one of these beautiful shrubs in bloom.

See Price List, Page 14

SPIREA ANTHONY WATERER

Low growing, pink flowers, periodical blooming through the summer. Used for edging and in front of shrubbery.

See Price List, Page 14

HYDRANGEA, HILLS OF SNOW

HYDRANGEA, P. G.

Bush form. Will grow on any soil. Too well known for description. Profusion of flowers from mid-summer until hard freezing in autumn. Desirable for cemetery planting and hedges. (Illustration on front cover).

See Price List, Page 14

NORWAY SPRUCE

NORWAY SPRUCE

One of the most valuable of evergreen trees, grows in perfect pyramidal shape. Beautiful for landscape work. Valuable as a Christmas tree and can be planted and allowed to grow for lumber purposes. Fine as a wind break.

See Price List, Fage 15

FORSYTHIA, (Golden Bell)

Medium sized shrub, flowers bright yellow, appearing very early in spring, just before leaves.

See Price List, Page 14

CATALPA BUNGI (Umbrella tree)

Tree grows in perfect umbrella shape, hence its name, foliage very dense, making perfect bird houses for the birds to build their nests. Leaves large, heart shape and deep green. Very desirable for lawn or cemetery planting.

Price List Page 15

CATALPA BUNGI

DEUTZIA

A very desirable shrub, producing a profusion of white flowers, late in June. Hardy in all localities.

See Price List, Page 15

BUTTERFLY BUSH

A peculiar shrub, new growth each summer, about 4 ft. in height. Long tapering panicles of lilac colored flowers. This shrub is especially interesting to children owing to the large number of butterflies which are attracted by it.

RHODODENDRON EVERGREEN SHRUB

Rhododendron Maximum Broad-leafed evergreen shrub, large clusters of delicate pink flowers,. Perfectly hardy in N. Y. State. This is one of the shrubs that takes the man's eye who is desirous of having his place a little nicer than the other fellow. This shrub does best on the shady side of a building. Will also grow in shade of trees. Our price is on large well rooted clumps, \$2.00 each, \$11.00 per 6.
